

# Miguel Campos

Web developer at Kaizen Institute

27/05/2000

+351 919562259

miguelccp@gmail.com

Aveiro - Portugal

## Skills

- HTML and CSS
- Scripting languages: JavaScript, PHP, MySQL, Java, C#, C, C++, Python
- Frameworks & Libraries: Flask, React, Bootstrap, Node.js, Express, Angular
- Understanding GIT, JSON, relational and non relational databases

## Certifications

- 100 Days of Code: The Complete Python Pro Bootcamp
- Complete C# Unity Game Developer 2D

## Honor & Award

1º Prize 2018/2019/2020

First Prize and Honors in Photography for 3 consecutive years on "Aveiro Jovem Criador"

## Hobbies & Interest

- Photography
- Motorsports
- Handball
- Karate

## About

I've always been a tech enthusiast with a passion for both cars and technology. Growing up, my dad, who worked in IT, took me to his office frequently, which sparked my interest in development. As I got older, I found myself experimenting with CMD scripts, developing **apps and websites**, and building computers in my free time.

Today, I'm focused on creating digital experiences that not only work well but also improve how people interact with technology. I currently work with the marketing team at Kaizen Institute on the development of the company's new website, using technologies such as **HTML, CSS, PHP, and AI-based solutions**. Outside of tech, I'm also a referee for the Federação de Andebol de Portugal (FAP), officiating both national and regional handball matches. This role has helped me develop strong decision-making, communication, and leadership skills under pressure.

## Education

2019-2022

### University of Aveiro

Integrated Master's in Electronic and Telecommunications Engineering (Course Work)

During my coursework, I focused on electronics, **programming**, and communication systems, gaining hands-on experience in embedded systems and network technologies. I worked on collaborative lab projects that strengthened both my technical expertise and teamwork skills.

- Network management: building and creating networks and sub-networks
- Programming: **C, C++, and Java**, enhancing problem-solving and coding abilities

2022-2025

### University of Aveiro

Bachelor's Degree in Multimedia and Communication Technologies

I've gained expertise in a wide range of technologies and tools. These experiences have allowed me to blend coding, design, and user experience into digital projects, giving me a well-rounded skill set in both web development and multimedia production.

Technical Skills

- Web Development: **HTML, CSS, JavaScript, PHP, MySQL, React, Node.js, Express, Bootstrap**
- Programming: **C#**
- Databases: Relational (**MySQL**), Non-Relational
- Design & UX: Brand Design, Web Design, User Experience

## Projects

### Car Jockey

Bachelor's Degree in Multimedia and Communication Technologies

This project is a web application designed to manage and interact with car listings. It is structured with a clear separation between the frontend and backend.

The frontend, is built with a JavaScript framework React, which provides a user-friendly interface for users to search, filter, view, and manage car listings.

The backend holds the server-side logic, including APIs, business logic, and database interactions, handling requests from the frontend, processing data, and serving it back to the user. This separation ensures a smooth, efficient user experience while maintaining robust functionality for managing car-related data.

### DupFree - Duplicate File Finder

Own Project

DupFree is a Windows desktop app built with C# (.NET 8) and WPF that helps users find and manage duplicate files and visually similar images. It detects duplicate files based on matching names and sizes, and for images, it uses perceptual hashing, a BK-tree index for efficient queries, and GPU-accelerated SSIM for fast, accurate comparisons.

The app features a modern UI with a dark theme, collapsible sidebar, and both list and grid views, offering an intuitive experience with keyboard navigation. It also includes an in-app recycle bin for safely deleting and restoring files, along with settings for a personalized experience.
